

Abdu-Lateef A. Lekan-Fadeyi

alekanfa@uoguelph.ca | (587)-228-1366 | linkedin.com/in/abdu-lateef-lf | github.com/Abdu-LateefLF

TECHNICAL SKILLS

Languages – Java, Typescript, C#, Python, JavaScript, SQL, C, C++, HTML/CSS

Frameworks/Libraries – Next.js, React.js, LangGraph, scikit-learn, .NET, LangChain, TensorFlow, Flask, FastAPI, Jest, pytest

Tools and Databases – Node.js, Git, GitHub, Docker, Nginx, Azure, AWS, GCP, Redis, Jupyter, PostgreSQL, Postman

Development Practices – Agile (Scrum), Distributed Systems, Design Patterns, CI/CD

EXPERIENCE

Classwise AI (www.classwise.ai)

May 2025 – Present

Co-Founder & Chief AI Officer (CAIO)

- Scaled platform to 8200+ assignments graded YTD, generating \$56K CAD in revenue and \$47K CAD in prize wins.
- Architected LangGraph AI grading pipelines with multimodal agents, model routing, async workers, and Postgres state.
- Built multimodal document pipelines for PDF/image grading with segmentation, extraction, validation, and retries.
- Built evaluation infrastructure measuring grading accuracy, failure modes, latency, token usage, and inference costs.
- Engineered distributed systems with queues, heartbeats, retries, and database locking for reliable AI workloads.

AskCipher

May. 2026 – Aug. 2026

AI Software Developer Intern

- Architected distributed microservices, solving cross-replica WebSocket routing for an AI agent to control a browser.
- Built a stateful LangGraph agent with Postgres checkpointing, letting browser tasks survive disconnects and resume.
- Designed a permission layer where tool identity classifies actions as safe read or risky write.
- Implemented a BM25 + cross-encoder reranking pipeline for chat memory, avoiding embedding infra costs entirely.

Magnet Forensics

Sep. 2025 – Dec. 2025

Software Developer Intern

- Built helper libraries using DI, Builder, and Factory patterns to enable a modular, testable .NET architecture.
- Implemented unit & mock tests (xUnit, Moq) with regression testing and CI/CD pipelines for reliable artifact ingestion.
- Queried SQLite databases with LINQ/EF Core, parsing JSON/PLists, and processed data for use by 6 products.
- Utilized reverse-engineering and Linux shell tools to map undocumented file paths and recover unsupported artifacts.

D2AI.ca

May 2025 – Aug. 2025

ML/AI Software Engineer Intern

- Created user authentication and profile management flows with FastAPI and Next.js, and AWS S3 for file storage.
- Developed a CNN pipeline with PyTorch, Mediapipe, and OpenCV to analyze basketball shots and provide feedback.

PERSONAL PROJECTS

Gate Scale (FinQL)

Apr. 2026

- Designed a custom DSL (FinQL) interpreter with a lexer, parser, sandboxed evaluator, and line-level error reporting.
- Built secure API key infrastructure with HMAC hashing, JWT refresh-token auth, and tier-aware Redis rate limiting.
- Deployed a production-grade multi-service stack with Docker Compose, Nginx load balancing, PostgreSQL, and Redis.
- Logged API request telemetry and built PostgreSQL analytics with per-key breakdowns and time-series dashboards.

Political Figure Classifier

Mar. 2025

- Built and deployed Flask REST API on Microsoft Azure, with Vue.js frontend for uploading images and viewing results.
- Improved political figure classification accuracy by 10% by optimizing feature extraction with wavelet transforms.
- Trained and tuned classification models (SVM, Random Forest, Logistic Regression) to achieve 92.31% accuracy.

EDUCATION

Bachelor of Computing, Software Engineering (Co-op), Minor in Business

2023 – 2028

University of Guelph, Guelph, ON

- Recipient of the Dean's Scholarship in recognition of outstanding academic achievement.
- Currently maintaining a 4.0 GPA (95% average), with top marks in Data Structures, OOP, and Software Design.
- Related Coursework: Operating Systems, Analysis & Design of Algorithms, S/W System Development & Integration.

ACTIVITIES AND LEADERSHIP

NEXT AI Canada & Google for Startups

Jan. 2026 – Present

1st Place, Siakam EdTech Demo Day

Aug. 2026

- Won \$30K CAD pitching Classwise AI to educators, investors, and industry leaders.

1st Place Winner, BFN Black Career Conference Pitch Competition

Jan. 2026

- Awarded \$5,000 grant for Classwise AI, placing 1st out of 100+ national founders at University of Toronto event.
